

OUR EXTENSIVE RANGE OF WEAR PARTS ARE DESIGNED TO SUIT MOST AUGERS AND GROUND CONDITIONS

Digga Wear Parts are cast to the highest quality and utilise premium grade tungsten carbides to ensure maximum wear life. Fitted with Digga's advanced PADLOC tooth locking system, your auger has never been so easy to maintain.

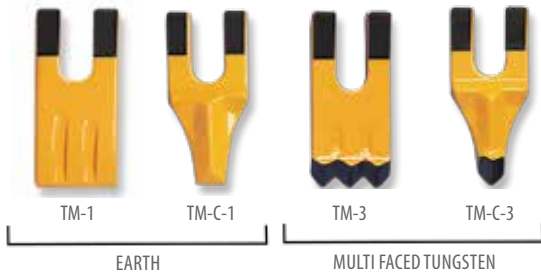

BLADED TEETH TO SUIT A4 AUGERS

ROCK/COMBINATION TAPER TEETH TO SUIT RC AUGERS

BLADED TEETH TO SUIT A6 AND A8 AUGERS

ROTATING ROCK PICKS TO SUIT ROCK AUGERS

IDEALLY SUITED FOR FRACTURABLE ROCK, CONCRETE AND ABRASIVE CONDITIONS. DIMPLED RETAINER PROVIDES INCREASED HOLDING POWER IN GROOVED BLOCKS.

WHAT IS PADLOCK?

Padlock tooth retaining system utilises heavy duty rubber pads vulcanised onto the metal legs of the teeth. Ensuring your teeth are locked in tight, but allowing for easy replacement in the field.

FEATURES

- 1 Step tooth replacement process - Knock in, knock out
- Fits most types of pockets and wearparts
- No special tools required
